

# ANIMAL TESTING

## POLICY

**Innospec, as a responsible global producer of specialty chemicals, is committed to:**

- Reducing and eliminating the need for animal testing where it is possible, from both a scientific and regulatory standpoint, whilst continuing to maintain existing products and innovate new technologies.
- Replacing animal testing with suitable alternatives, such as,
  - new approach methods (NAMs), including *in vitro* and *in silico* assays
  - next generation risk assessment (NGRA) approaches
- Working with external bodies such as the International Collaboration on Cosmetic Safety (ICCS) to progress and advance the work on alternative methods.
- Remaining legally compliant with local, regional and international regulatory requirements.
- Completing animal testing only as a last resort, only when mandated by a regulatory authority and when no approved alternative exists.
- Pursuing all other options prior to animal testing, including appeals to the authorities and advocating for,
  - avoiding animal testing altogether, or
  - using alternative methods
